

14M-pitch timing belts have a 14mm curvilinear tooth pitch. They are used in heavy drives. We make our 14M-pitch timing belts with a thermoset rubber reinforced with fiberglass.

When considering a 14M pitch in a new drive system, you might also consider a curvilinear S14M (super high torque) rubber belt or the metric trapezoidal T-10 and AT-10 polyurethane belts. For the best performance however, use one of the following belt designs: Goodyear BlackHawk Pd™ (improvement on RPP Panther and QT Power Chain®), Goodyear Falcon Pd™ (improvement on Gates PolyChain® GT®2), Goodyear's Eagle Pd™ helical offset tooth (the most advanced belt design today).

Style	Teeth Length	
826-14M	59	826
924-14M	66	924
966-14M	69	966
1092-14M	78	1092
1190-14M	85	1190
1358-14M	97	1358
1400-14M	100	1400
1610-14M	115	1610
1778-14M	127	1778
1890-14M	135	1890
1904-14M	136	1904
2100-14M	150	2100
