

T5-pitch timing belts have a 5mm trapezoidal tooth pitch. They are used in small to medium drives.

We typically reinforce our T5-pitch timing belts with steel, although we can make a special production to incorporate Kevlar.

When considering an T5 pitch in a new drive system, you might also consider an American trapezoidal XL or a metric trapezoidal AT-5 pitch. Both are made in polyurethane reinforced with steel. Also consider metric curvilinear 5M (high torque) or S5M (super high torque), both in rubber.
